Description of Duties
The Operations Analyst is a mid-level position within Data Center Operations. The Operations Analyst is expected to understand the Unit's business objectives and contribute to the Unit's ability to achieve the Customer Service objectives. The Operations Analyst differs from the Analyst II primarily in the degree of independent action and judgement, depth of technical skills and in the awareness and use of business factors in carrying out assignments. Performance Objectives: 1. Support to ensure that Data Center Operations incidents resolved quickly in order to minimize service disruption. These activities interface with the organization's problem and change management processes. • Trained staff and customers in computer-system setup and operations. • Gained excellent experience in system operations and various types of hardware and software.
